

Hurricanes Ingrid and Manuel

23 Sep 2013

Resources have been mobilized in response to damaged caused by hurricanes Ingrid and Manuel. Our office in Mexico is monitoring the adjuster and engineer needs. Claim notifications have seen a wide range of losses from schools and hospitals to road collapse and landslides. Mostly we are seeing losses from the torrential and sustained rainfall.

Ian Whitmore confirms that within Mexico we have access to over 40 adjusters and engineers, and these can be supported through resources in Colombia, Argentina, Miami and London.

Please download our report [here](#).

For further detail please contact Alistair Jacob or Marc Godfrey in London and Ian Whitmore in Mexico. Details are listed below.
